adjust the traffic flow by changing allocation of the forwarding addresses;

wherein the load-sharing redundancy group provides failover services in the event that one of the gateway devices ceases operation;

wherein the first gateway device actively forwards packets simultaneously with the second gateway device, and the second gateway device is actively forwards packets simultaneously with the first gateway device.

For claims 39-43, the prior art fails to teach or render obvious the combination of:

measure the traffic flow to each forwarding address; and

adjust the measured traffic flow by changing allocation of the forwarding addresses;

wherein the load-sharing redundancy group provides failover services in the event that one of the gateway devices ceases operation;

wherein both the first gateway device and the second gateway device forward packets at a given point in time

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
